

Dewey Decimal Classification

The Dewey Decimal Classification is an orderly way of organizing and locating the books you are looking for. The books on the shelves have a number located at the base of their spine. This number is the Dewey Decimal number, and it tells what section located in. When you look up a book, the number it gives you is the Dewey Decimal Number. Match the number with the books on the shelf to find that book. The organization is as follows:

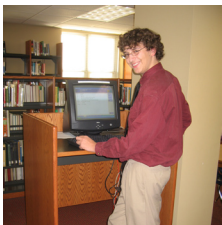

Here are some pictures from around the library

The library is open throughout the entire school day.

The library is a great place to study.

J. Czeczulin makes use of the library's online catalog.

Brother Dan enjoys a book.

Don't like studying alone? Then study with your friends!

A few of the student members of the Library Advisory Committee

There are a lot of books!

After school, the library is a great place to do homework.

Jeremy Czeczulin

Anyone can come in and use the library!

As always, Mrs. Kennedy and Mrs. Hauf are in the library to answer any questions you have about the Dewey Decimal Classification System and other subjects.
